

Work Report: Android Factory Reset Date Detection

1. Project Overview:

This project retrieves the estimated factory reset date of an Android device. It works for both rooted and non-rooted devices and includes additional functionality to detect root status.

2. Development Details:

- **Technology Stack:** Kotlin, Jetpack Compose, Android SDK.
- **Key Features:**
 - Retrieves factory reset date using Android ID and first app install time.
 - Detects whether the device is rooted.
 - Displays results in a user-friendly UI.

3. Testing Instructions:

- **Installation:**
 1. Install the provided APK on your Android device.
 2. Open the app and grant necessary permissions.
- **Functionality Testing:**
 1. Observe the displayed factory reset date and root status.
 2. Compare with expected values based on device history.
 3. Provide feedback on accuracy or any issues encountered.
